

STEIN BR24-160 50.000 Lm

**!Heat-High Voltage-Peak-Protected
Does Not Produce Frequency Interference**

Marine Grade Downlight

Information

This Special Product, Equipped With High Lumen Power And An Elegant Design, Has Been Designed To Operate In All Adverse Condition Underwater This Product Is Completely Waterproof And Provides You With High-Powered Seamless And Comfortable Lighting While You're On Your Yacht The STEIN Difference **ALWAYS BETTER**

Product Specification

- Power Consumption (WHITE): 160 Watt
- Power Consumption (BLUE): 120 Watt
- Power Consumption (WHITE & BLUE): 140 Watt
- Voltage: 24 VDC
- Driver.....: Internal Driver
- Light Source.....: High Power Led
- Fixture Lumens.....: 50.000 Lm
- Light Color.....: Standart White 6.500k OR Blue
- Light Color.....: Optional White And Blue
- For Blue and White (Blue 11.000 lumens) (White 25.000 lumens)

Dimensions

Temp Control	Does Not Cause Fire	Voltage Limit
--------------	---------------------	---------------

Material

316 Stainless Steel

Connection

Mounting Position

To make the best use of light efficiency the lens angles have been specially optimized to create a parallel light on the sea surface. For example, horizontally at 30°-40°-50° and vertically at 5°-10°-15°, with different angles complementing each other, providing an excellent pattern on the water surface

Standart Light Colors

Optional Light Color
